Faculty of Engineering and Technology

Department of Computer Science & Engineering

Three-Year Full-Time Education Program

**Bachelor of Computer Applications**  
**(Cloud Computing/**  
**Artificial Intelligence & Machine Learning/ Data**  
**Science/Web Programming/ Cybersecurity)**

With effect from Session 2024 - 25

*[Handwritten signatures and initials in blue ink]*

## Bachelor of Computer Applications (Web Program): mking (T): 18 Science/CyberSecurity/Cloud Computing)- AY 2024-25

CIS-500 SYLLABUS												
Section	Discipline Specific Courses - Core			MCIS	Program Elective Courses	Minor Electives Courses	Student Learning Outcomes	Prerequisite Courses	Value Added Courses	Skill Enhancement Courses	Credits	
1	Mathematics-I (1-1-0-0)	Fundamentals of Computers and IT (1-1-1-1)	Introduction to Programming Technology using C++ (1-0-2-0)						MCIS-1 (1-0-0-1)	MCIS-2 (1-0-0-2)	20	
2	Statistics for Computing (1-1-0-0)	Data Structures and Algorithms using C++ (1-0-1-1)	Web Programming (1-0-2-0)						MCIS-3 (1-0-0-3)	MCIS-4 (1-0-0-4)	20	
Students enrolling for programs after securing 30 credits will be awarded US Credits in the relevant disciplines / Subject provided they secure 2 credits in work based vocational courses offered during semester year or Internship / Apprenticeship in addition to 4 credits from discipline courses earned during that and second semester.												
3	Object oriented Development using C++ (1-0-2-0)	Networks and Systems (1-0-2-0)		Personalized Development & Career Building (1-0-0-0)	Minor Electives Courses (1-0-0-0)	Minor Electives Courses (1-0-0-0)	Minor Electives Courses (1-0-0-0)	MCIS-5 (1-0-0-5)	MCIS-6 (1-0-0-6)	MCIS-7 (1-0-0-7)	20	
4	Database Management Systems (1-0-2-0)	Java Programming (1-0-2-0)		Quantitative Aptitude & Logical Reasoning (1-0-0-0)	Minor Electives Courses (1-0-0-0)	Minor Electives Courses (1-0-0-0)	Minor Electives Courses (1-0-0-0)	MCIS-8 (1-0-0-8)	MCIS-9 (1-0-0-9)	MCIS-10 (1-0-0-10)	20	
Students enrolling for programs after securing 30 credits will be awarded US Credits in the relevant disciplines / Subject provided they secure additional 4 credits in skill based vocational courses offered during first year or second year summer term.												
5	Principles of Cyber Security (1-0-2-0)	Integrated Software Engineering (1-0-2-0)	Web Development using PHP (1-0-1-0)		MCIS-11 (1-0-0-11)	Minor Electives Courses (1-0-0-0)	Minor Electives Courses (1-0-0-0)	MCIS-12 (1-0-0-12)	MCIS-13 (1-0-0-13)	MCIS-14 (1-0-0-14)	20	
6	Problem Solving using Python (1-0-2-0)	Data Mining and Data Mining (1-0-2-0)	Introduction to Data Mining (1-0-2-0)		MCIS-15 (1-0-0-15)	Minor Electives Courses (1-0-0-0)	Minor Electives Courses (1-0-0-0)	MCIS-16 (1-0-0-16)	MCIS-17 (1-0-0-17)	MCIS-18 (1-0-0-18)	20	
Students who secure to undertake 3 year US programme will be awarded US Credits in the relevant disciplines / Subject upon securing 120 credits.												
Final Project											Final Project	120

## 1. NATURE AND EXTENT OF THE PROGRAM

The BCA course is a full time three years (six semesters) Bachelor's Degree in Computer Application. The basic objective of BCA Course is to provide young men and women with the required knowledge and necessary skills to get rewarding careers into the changing world of Information Technology. The course focuses on imparting knowledge and skills in computer technology that includes programming languages and database management.

### Eligibility Criteria:

A candidate seeking admission to the BCA Course must have passed 10+2 (any stream) securing not less than 60% marks in aggregate (5% relaxation to ST/SC candidates) from the Central Board of Secondary Education or any other equivalent examination recognized by the Mizoram University preferably with Mathematics as one of compulsory or optional course, or any other vocational course related to the computer stream having either Computer Science or Computer Engineering as compulsory/optional course.

Handwritten signatures and initials are present at the bottom of the page, including a large signature in the center, a signature to the left, and several initials and smaller signatures to the right.

## 2. PROGRAM EDUCATION OBJECTIVES (PEOs)

After completing BCA, students will be able to:

PEO No.	Education Objective
PEO1	Demonstrate analytical and design skills including the ability to generate creative solutions and foster team-oriented professionalism through effective communication in their careers.
PEO2	Graduates would expertise in successful careers based on their understanding of formal and practical methods of application development using the concept of computer programming languages and design principles in national and international level.
PEO3	Exhibit the growth of the nation and society by implementing and acquiring knowledge of upliftment of health, safety and other societal issues.
PEO4	Implement their exhibiting critical thinking and problem- solving skills in professional practices or tackle social, technical and business challenges.

### 3. GRADUATE ATTRIBUTES

Sl. No.	Attributes	Description
1	Professional / Disciplinary Knowledge	BCA typically covers a broad range of topics related to computer hardware, software, algorithms, data structures, and programming languages.
2	Technical / Practical skills	<p>In a BCA program, BCA students need to have a strong foundation in computer science concepts and programming languages such as Java, C++, Python, etc. In a BCA program, laboratory skills may involve setting up and configuring computer systems, installing software, and troubleshooting hardware and software issues. BCA students need to have practical skills in software development methodologies such as Agile, Scrum, and Waterfall. They need to be able to write code that is well-documented, modular, and maintainable.</p> <p>In summary, a BCA program requires a combination technical, laboratory and practical skills.</p>

Handwritten signatures and initials are present below the table.

3	Communication Skill	In a BCA program, Communication skills are an essential part of education and can help students excel in various aspects of their career. BCA students must develop excellent communication skills to become successful software professionals.
4	Conduct	BCA student conduct investigations of complex problems using research-based knowledge and research methods including design of experiments, analysis and interpretation of data and synthesis of information to provide valid conclusions.
5	Modern Tool Usage	Create, select and apply appropriate techniques, resources and modern engineering and IT tools including prediction and modeling to complex engineering activities with an understanding of the limitations.
6	The Engineer and Society	Apply reasoning informed by contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to professional engineering practice.
7	Environment and Sustainability	Understand the impact of professional engineering solutions in societal and environmental contexts and demonstrate knowledge of and need for sustainable development.

8	Ethics	Apply ethical principles and commit to professional ethics and responsibilities and norms of engineering practice.
9	Individual and Team Work	Function effectively as an individual, and as a member or leader in diverse teams and in multi-disciplinary settings
10	Communication	Communicate effectively on complex engineering activities with the engineering community and with society at large, such as being able to comprehend and write effective reports and design documentation, make effective presentations and give and receive clear instructions.
11	Project Management and Finance:	Demonstrate knowledge and understanding of computer applications and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
12	Life-long Learning:	Recognize the need for and have the preparation and ability to Engage in independent and life-long learning in the broadest context of technological Change.

#### 4. QUALIFICATION DESCRIPTORS:

BCA (Bachelor of Computer Applications) is an undergraduate program that prepares students for a career in the field of computer science and technology. Some of the qualification descriptors for BCA program are:

**Technical knowledge:** BCA graduates should have a strong foundation in computer science concepts and should be familiar with programming languages, algorithms, data structures, operating systems, databases, computer networks, and other related technologies.

**Analytical skills:** BCA graduates should possess strong analytical skills to analyze and solve complex problems related to computer systems and software applications.

**Creativity:** BCA graduates should be able to think creatively to design and develop innovative software applications, websites, and computer systems.

**Teamwork:** BCA graduates should be able to work collaboratively in a team environment to develop and implement software applications and computer systems.

**Communication skills:** BCA graduates should possess excellent communication skills to articulate technical concepts and ideas to a diverse audience.

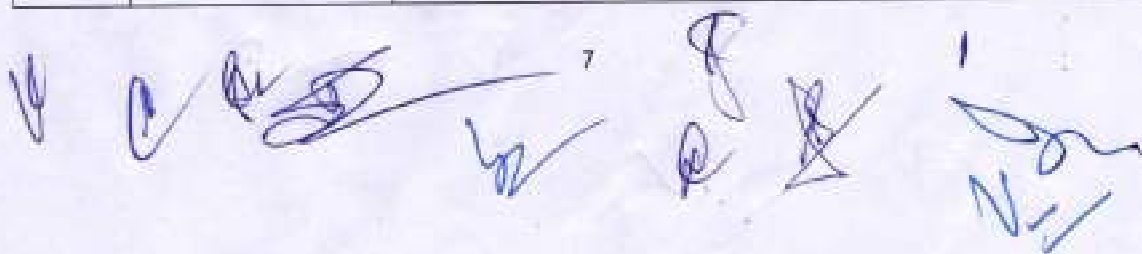

**Project management skills:** BCA graduates should have project management skills to plan, organize, and execute software development projects successfully.

**Ethical and professional conduct:** BCA graduates should adhere to ethical and professional conduct in their work and be aware of the impact of technology on society and the environment.

## 5. PROGRAM OUTCOME

PO No.	Attribute	Competency
PO1	Professional knowledge	Professional Knowledge: Refers to the expertise and understanding of a particular field or profession, including its principles, concepts, theories, and practices. It is the foundation upon which individuals build their professional skills and develop their careers.
PO2	Technical skills	Technical Skills: Refers to the abilities and expertise needed to perform specific tasks within a clinical or technical setting. This includes skills such as diagnostic assessment, treatment planning, technical procedures, and the use of specialized equipment.
PO3	Team work	Team work: Refers to the ability to work collaboratively with others towards a common goal. This involves effective communication, coordination, and cooperation among team members, as well as a willingness to share responsibilities and support others in achieving their objectives.
PO4	Ethical value & professionalism	Ethical Value <u>&amp;amp;</u> Professionalism: Refers to the principles, values, and behaviors that are expected of professionals in their work. This includes a commitment to ethical behavior, honesty, integrity, respect for others, and a dedication to upholding the highest standards of professionalism in one's field.
PO5	Communication	Communication: This includes the use of verbal and nonverbal communication skills, active listening, and the ability to adapt communication style to different audiences and situations.

42

PO6	Evidence based practice/learning	Evidence-Based Practice/Learning: Refers to the use of the best available evidence to guide decision-making and practice in a particular field or profession.
PO7	Life-long learning	Lifelong Learning: Refers to the ongoing process of acquiring new knowledge, skills, and competencies throughout one career. This involves a commitment to continuous learning and professional development, as well as a willingness to adapt to changes in one's field or profession.
PO8	Entrepreneurship, leadership and mentorship	<p>Entrepreneurship: Refers to the ability to identify and pursue opportunities to create new ventures or initiatives within a particular field or profession. This involves a willingness to take risks, innovate, and adapt to changing market conditions.</p> <p>Leadership: Refers to the ability to inspire, motivate, and guide others towards a common goal. This involves setting a clear vision, establishing a culture of collaboration and accountability, and providing direction and support to team members.</p> <p>Mentorship: Refers to the process of providing guidance, support, and advice to individuals who are seeking to develop their skills and advance their careers. This involves sharing knowledge and experience, providing feedback and encouragement, and serving as a role model and advocate for others.</p>

## 6. PROGRAM SPECIFIC OUTCOME

PSO No.	Competency
PSO1	Graduates of the program will be able to design, implement, and maintain complex software systems using a range of programming languages and tools.
PSO2	Graduates of the program will be able to analyze and solve complex problems in Computer Science & Engineering using a range of algorithms and data structures.
PSO3	Graduates of the program will be able to communicate effectively with technical and non-technical audiences, and work collaboratively in teams to solve complex problems.

Handwritten signatures and initials in blue ink, including:

- Top row: A stylized signature, a large 'B' with a diagonal slash, a signature, and a signature.
- Bottom row: A signature, a signature, a large 'P', a signature, and a signature.

## 7. COURSE STRUCTURE

Name of the Program	Bachelor of Computer Applications										
Course Code											
Course Title	Mathematics-I										
Academic Year	I										
Semester	I										
Number of Credits	3										
Course Prerequisite	Basic Mathematics										
Course Synopsis	In this course, Students will learn about basic concepts of Engineering Mathematics such as Determinants, Matrices, Sequence and series, Differentiation and integration.										
<b>Course Outcomes:</b> At the end of the course students will be able to:											
CO1	Familiarity with Matrices and Determinants.										
CO2	To determine general term of series in AP and GP, Calculate sum of n terms of series.										
CO3	To gain insight of differentiation and its applications.										
CO4	To gain insight of integration and its applications.										
<b>Mapping of Course Outcomes (COs) to Program Outcomes (POs) &amp; Program Specific Outcomes:</b>											
COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PSO1	PSO2	PSO3

Faculty of Engineering and Technology	
<b>Name of the Department</b>	Computer Science & Engineering
<b>Name of the Program</b>	Bachelor of Computer Applications
<b>Course Code</b>	
<b>Course Title</b>	Fundamentals of Computers and Information Technology
<b>Academic Year</b>	I
<b>Semester</b>	I
<b>Number of Credits</b>	3
<b>Course Prerequisite</b>	Basics of Computers
<b>Course Synopsis</b>	In this course, Students will learn about fundamental concepts of computers, Number system, basics of Information Technology
<b>Course Outcomes:</b>	
At the end of the course students will be able to:	
<b>CO1</b>	Understanding the concept of input and output devices of Computers
<b>CO2</b>	Learn the functional units and classify types of computers, how they process information and how individual computers interact with other computing systems and devices
<b>CO3</b>	Understand an operating system and its working, and solve common problems related to operating systems
<b>CO4</b>	Know fundamental concepts of computers, Number system, basics of Information Technology
<b>Mapping of Course Outcomes (COs) to Program Outcomes (POs) &amp; Program Specific Outcomes :</b>	

COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PSO1	PSO2	PSO3
CO1	3	2	-	2	-	-	2	-	2	3	-
CO2	3	3	3	-	-	-	-	-	1	2	-
CO3	3	1	-	3	-	-	2	-	3	1	-
CO4	3	2	2	3	-	-	-	-	2	2	-
Average	3	2	1.2	2	-	-	1	-	2	2	-

**Course Content:**

L (Hours/Week)	T (Hours/Week)	P (Hours/Week)	Total Hour/Week
3			3

Unit	Content & Competencies
1	<p><b>Introduction to Computers:</b></p> <p>Describe Evolution of computers: Computer Generation from First Generation to Fifth Generation. (C1: Knowledge)</p> <p>Classifications of Computers: Micro, Mini, Mainframe and supercomputers, Distributed Computer System, Parallel Computers. (C2: Comprehension)</p> <p>Explain Computer Hardware: Major Components of a digital computer, Block Diagram of a computer. (C2: Comprehension)</p> <p>Discuss Input devices, Output Devices. Computer Memory: Memory Cell (C2: Comprehension)</p> <p>Analysis of Memory Organization, Primary Memory: RAM &amp; ROM, Secondary memory, Flash Drives, Solid State Drives. (C4: Analysis)</p>

Handwritten signatures and initials are present at the bottom of the page.

2	<p><b>Introduction to System Software and Operating System:</b></p> <p>Describe Computer Software: Machine language, Assembly language, high-level languages, fourth generation language, assemblers, compilers, interpreters, linkers, loaders. (C2: Comprehension)</p> <p>Analyze Operating System concepts: different types of operating systems, functions of operating system (C4: Analysis)</p> <p>Implement the concept of multiprogramming, multitasking, multithreading, multiprocessing, time-sharing, real time, single-user &amp; multi-user operating system. (C3: Application)</p>
3	<p><b>Number Systems:</b></p> <p>Introduction to number systems, Decimal number system-Definition, digits, radix/base, Binary number system – Bit Byte (C1: knowledge)</p> <p>Apply Conversions: Binary to Decimal and Decimal to Binary, Octal number system Conversion from Octal to Decimal to Octal, Octal to Binary and binary to Octal, Hexadecimal number system –Conversion: Decimal to Hex, Hex to decimal, Hex to Binary, Binary to Hex, Octal to Hex, Hex to Octal (C3: Application)</p> <p>Implement binary addition, subtraction, multiplication and division (only Integer part). (C3: Application)</p> <p>Evaluate 1's and 2's complement: 2's complement subtraction. (C5: Evaluation)</p>
4	<p><b>Electronic Payment System:</b></p> <p>Describe Secure Electronic Transaction, Types of Payment System: Digital Cash, Electronic Cheque, Smart Card, Credit/Debit Card (C2: Comprehension)</p> <p>Introduction to Bluetooth, Cloud Computing, Big Data, Data Mining, Mobile Computing and Embedded Systems and Internet of Things (IoT) (C1: knowledge)</p>

A collection of handwritten signatures and initials in blue ink, located below the table. There are approximately ten distinct marks, including a large 'A' on the left, a 'B' and 'H' in the middle-left, a 'b' and a large stylized signature in the center, a 'J' and 'S' on the right, and a 'W' on the far right.

### Teaching Learning Strategies and Contact Hours

Learning Strategies	Contact Hours

Handwritten signatures and initials in blue ink, including a large signature at the bottom center and several smaller initials scattered around.

Faculty of Engineering and Technology											
Name of the Department	Computer Science & Engineering										
Name of the Program	Bachelor of Computer Applications										
Course Code											
Course Title	Fundamentals of Computers and Information Technology Lab										
Academic Year	I										
Semester	I										
Number of Credits	1										
Course Prerequisite	NIL										
Course Synopsis	In this course, Students will learn about fundamental concepts of Computers, basics of HTML Programming.										
Course Outcomes:											
At the end of the course students will be able to:											
CO1	Understand basic concepts and organization of computer system										
CO2	Understand Functions of Excel										
CO3	Learn about basic HTML Commands										
CO4	Learn to design web sites										
Mapping of Course Outcomes (COs) to Program Outcomes (Pos) & Program Specific Outcomes:											
COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PSO1	PSO2	PSO3
CO1	2	3	-	2	-	2	-	2	2	-	3

CO2	2	3	3	-	-	-	-	-	1	-	2
CO3	3	3	-	-	-	2	-	2	3	-	1
CO4	1	3	2	3	-	-	-	-	2	-	2
Average	2	3	1.2	2.5		1		1	2		2

**Course Content:**

L (Hours/Week)	T (Hours/Week)	P (Hours/Week)	Total Hour/Week
-		2	2

Unit	Content & Competencies
1	Dismantling the system unit, recognize all major components inside a PC, describe function of each component and define the relationship of internal components (C1: Knowledge)
2	Operating system-Definition & functions, basics of Windows. Basic components of windows, icons, types of icons, taskbar, activating windows, using desktop, title bar, running applications, exploring computer, managing files and folders, copying and moving files and folders (C3: Application)
3	Control panel – display properties, adding and removing software and hardware, setting date and time, screensaver and appearance. Using windows accessories. (C3: Application)
4	Documentation Using MS-Word – Introduction to Office Automation, Creating & Editing Document, Formatting Document, Auto-text, Autocorrect, Spelling and Grammar Tool, Document Dictionary, Page Formatting (C4: Analysis)
5	Advance Features of MS-WordMail Merge, Tables, File Management, Printing, Styles, linking and embedding object, Template (C2: Comprehension)

6	MS-Excel – Introduction to MS-Excel, Creating & Editing Worksheet, Formatting and Essential Operations, Formulas and Functions, Charts, Advance features of MS-Excel-Pivot table & Pivot Chart (C5: Evaluation)
7	Presentation using MS-PowerPoint: Presentations, Creating, Manipulating & Enhancing Slides, Organizational Charts, Excel Charts, Word Art, Layering art Objects, Animations and Sounds, Inserting Animated Pictures or Accessing through Object, Inserting Recorded Sound Effect or In-Built Sound Effect (C6: Synthesis)
8	Create an office writer document and using tables distinguish between different types of memories (C6: Synthesis)
9	Draft a letter asking for quotations of different peripheral devices for your computer lab and mail the letter using mail merge in open office writer (C6: Synthesis)
10	Create a template and draw a basic block diagram of computer & using graphs compare the performance of different laptop/notebook PC (C6: Synthesis)
11	Evaluate basic HTML Tags (C5: Evaluation)
12	Create a table to show your class timetable. Use tables to provide layout to your HTML page describing your university infrastructure (C6: Synthesis)
13	Use frames in HTML such that page is divided into 3 frames 20% on left to show contents of pages, 60% in center to show body of page, remaining on right to show remarks (C3: Application)
14	Create HTML pages showing timetable of trains departing from Delhi railway station (C6: Synthesis)
15	Create web pages for your college using HTML (C6: Synthesis)

L (Hours/Week)	T (Hours/Week)	P (Hours/Week)	Total Hour/Week
3			3

Unit	Content & Competencies
1	<p><b>Introduction:</b></p> <p>Algorithms, flow charts, decision tables, pseudo code, characteristics of a good programming language (C1: Knowledge, C2: Comprehension)</p> <p>Planning the Computer Program: Concept of problem solving, Problem definition (C2: Comprehension)</p> <p>Program design (C6: Synthesis)</p> <p>Discuss Debugging, Types of errors in programming, Documentation. (C2: Comprehension)</p> <p>Explain Structured programming concepts (C2: Comprehension)</p> <p>Analyze Programming methodologies viz. top-down and bottom-up programming (C4: Analysis)</p> <p>Evaluate Advantages and disadvantages of Structured programming (C5: Evaluation)</p>

Handwritten signatures and marks at the bottom of the page.

2	<p><b>From algorithms to programs:</b></p> <p>Explain source code, variables (with data types) variables and memory locations (C1: Knowledge)</p> <p>Distinguish Syntax and Logical Errors in compilation (C4: Analysis)</p> <p>Explain object and executable code, Arithmetic expressions and precedence (C2: Comprehension)</p> <p>Analyze Conditional Branching and Loops (C4: Analysis)</p> <p>Writing and evaluation of conditionals and consequent branching, Iteration and loops (C6: Synthesis)</p> <p>Construct Arrays: Arrays (1-D, 2-D), Character arrays and Strings (C6: Synthesis)</p>
3	<p><b>Basic Algorithms:</b></p> <p>Design Searching algorithms, Basic Sorting Algorithms (Bubble, Insertion and Selection) (C5: Evaluation)</p> <p>Finding roots of equations, notion of order of complexity through example programs (no formal definition required) (C5: Evaluation)</p> <p>Describe Functions (including using built in libraries), Parameter passing in functions, call by value, passing arrays to functions: idea of call by reference (C2: Comprehension)</p> <p>Implement Recursion, as a different way of solving problems. Example programs, such as Finding Factorial, Fibonacci series, Quick sort, Merge sort. (C3: Application)</p>
4	<p><b>Structure:</b> Structures, Defining structures and Array of Structures (C1: Knowledge)</p> <p><b>Pointers:</b> Understanding Pointers, Accessing the Address of a Variable, Declaration and Initialization of Pointer Variables, Accessing a Variable through its Pointer (C2: Comprehension, C3: Application)</p>

Handwritten signatures and marks in blue ink at the bottom of the page, including several distinct signatures and checkmarks.

Unit	Content & Competencies
1	Understand I/O statements, operators, expressions (C1: Knowledge)
2	Develop Decision-making constructs: if-else, go to, switch-case, break-continue (C6: Synthesis)
3	Design Loops: for, while, do-while (C6: Synthesis)
4	Implement Arrays: 1D and 2D, multi-dimensional arrays (C3: Application)
5	Implement Strings: operations (C3: Application)
6	Implement Functions: call, return, passing parameters by (value, reference), passing arrays to function (C3: Application)
7	Apply Recursion Concept using Factorial (C3: Application)
8	Show the concept of Pointers: Pointers to functions, Arrays, Strings, Pointers to Pointers, Array of Pointers (C2: Comprehension)
9	Demonstrate Structures: Nested Structures, Pointers to Structures, Arrays of Structures and Unions (C3: Application)
10	Implement Files: reading and writing, File pointers, file operations, random access, processor directives (C3: Application)
11	Write a C program to find roots of a Quadratic equation (C1: Knowledge)

*[Handwritten signatures and marks at the bottom of the page]*

12	Write a C program to generate the Fibonacci sequence of first N numbers (C1: Knowledge)
13	Write a C program to check whether the given string is palindrome or not without using Library functions (C1: Knowledge)
14	Write a C program to generate Prime numbers in a given range using a user defined function (C1: Knowledge)
15	Write a C program to maintain a record of n student details using an array of structures with four fields - Roll number, Name, Marks and Grade. Calculate the Grade according to the given conditions. (C1: Knowledge)
16	Design a C program to input two matrices and perform matrix multiplication on them (C6: Synthesis)

Name of the Program	Bachelor of Computer Applications
Course Code	
Course Title	Data Structure and Algorithms using C

Academic Year	I
Semester	II
Number of Credits	3
Course Prerequisite	Programming Fundamentals
Course Synopsis	In this course, students will learn about a variety of data structures such as hash tables, search trees, tries, heaps, graphs, and analyze the algorithms to determine the time and computation complexity.

#### Course Outcomes:

At the end of the course students will be able to:

CO1	Analyze the algorithms to determine the time and computation complexity and justify the correctness
CO2	Write algorithms concerning various data structures like Stack, Queue, Linked list, Graph search and traversal techniques
CO3	Introduces a variety of data structures such as hash tables, search trees, heaps, graphs
CO4	Introduces sorting and pattern matching algorithms.

#### Mapping of Course Outcomes (COs) to Program Outcomes (POs) & Program Specific Outcomes:

Q11

2	<p><b>The Stacks:</b></p> <p>Evaluate ADT Stack and its operation (C5: Evaluation)</p> <p>Apply Array based implementation of stacks (C3: Application)</p> <p>Apply Linked List based implementation of stacks (C3: Application)</p> <p>Examples: Infix, postfix, prefix representation, Conversions, Applications, Algorithms and their complexities</p>
3	<p><b>Trees:</b></p> <p>Basic Terminology (C1: Knowledge)</p> <p>Construct Binary Trees and their representation, expression evaluation, Complete Binary trees, Extended binary trees, traversing binary trees (C6: Synthesis)</p> <p><b>Graphs:</b></p> <p>Describe Terminology and Representations (C2: Comprehension)</p> <p>Design Graphs &amp; Multigraphs, Directed Graphs, Sequential representation of graphs (C6: Synthesis)</p>
4	<p><b>Sorting Algorithms:</b></p> <p>Introduction to sorting algorithms (C1: Knowledge)</p> <p>Implement Sorting by exchange, selection sort, insertion sort, Bubble sort, Straight selection sort, Efficiency of above algorithms (C3: Application)</p> <p>Apply Merge sort, Quick sort Algorithm analysis, heap sort: Heap Construction, Heap sort, bottom – up, Top – down (C3: Application)</p> <p>Analyze Heap sort approach (C4: Analysis)</p> <p>Design Searching Algorithms: Straight Sequential Search, Binary Search (C6: Synthesis)</p>

Faculty of Engineering and Technology												
Name of the Department			Computer Science & Engineering									
Name of the Program			Bachelor of Computer Applications									
Course Code												
Course Title			Data Structure and Algorithms using C Lab									
Academic Year			I									
Semester			II									
Number of Credits			1									
Course Prerequisite			Programming Fundamentals									
Course Synopsis			In this course, students will learn to design and implement data structure algorithms using C.									
Course Outcomes:												
At the end of the course students will be able to:												
CO1		Analyze the algorithms to determine the time and computation complexity and justify the correctness.										
CO2		Implement a given Search problem (Linear Search and Binary Search).										
CO3		Write algorithms concerning various data structures like Stack, Queue, Linked list, Graph search and traversal techniques and analyze the same to determine the time and computation complexity										
CO4		Write an algorithm for Selection Sort, Bubble Sort, Insertion Sort, Quick Sort, Merge Sort, Heap sort and compare their performance in terms of Space and time complexity.										
Mapping of Course Outcomes (COs) to Program Outcomes (POs) & Program Specific Outcomes:												
COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PSO1	PSO2	PSO3	
CO1	2	2	3	1	2	-	1	-	1	2	-	
CO2	2	-	3	-	2	-	-	-	-	-	-	
CO3	2	-	3	-	2	-	-	-	3	-	-	
CO4	2	2	3	3	2	-	3	-	2	1	-	
Average	2	1	3	1	2	-	1	-	1.5	0.75	-	

Course Content:			
L (Hours/Week)	T (Hours/Week)	P (Hours/Week)	Total Hour/Week
		2	2
Unit	Content & Competencies		
1	Write a program for multiplication and transpose of array (C1: Knowledge)		
2	Write a program to compute the transpose of a sparse matrix (C1: Knowledge)		
3	Implement a program to implement push and pop operation in Stack (C3: Application)		
4	Write a program to convert an Infix notation to postfix notation using stacks (C1: Knowledge)		
5	Develop a program to evaluate postfix notation using stacks (C6: Synthesis)		
6	Write a program to implement a linear queue (C1: Knowledge)		
7	Demonstrate a program for swapping two numbers using call by value and call by reference strategies (C3: Application)		
8	Develop a program to insert and delete a node in the linked list. The number of nodes to inserted and deleted should be governed by user (C6: Synthesis)		
9	Write a program to implement a linear search arrays and linked list (C1: Knowledge)		
10	Using iteration and recursion concepts write programs for finding the element in the array using the Binary search method (C6: Synthesis)		
11	Write the programs to implement bubble sort (C1: Knowledge)		
12	Write a program using iteration and recursion concepts for quicksort (C1: Knowledge)		
13	Write a program to implement the tree traversal methods (C1: Knowledge)		
14	Write a program that implements the following i) Insertion sort ii) Merge sort iii) Heap sort (C1: Knowledge)		
15	Write a program to perform the following operations: a) Insert an element into a AVL tree. b) Delete an element from a AVL tree. c) Search for a key element in a AVL tree. (C1: Knowledge)		

Handwritten signatures and initials at the bottom of the page.

<b>Name of the Department</b>	Computer Science & Engineering
<b>Name of the Program</b>	Bachelor of Computer Applications
<b>Course Code</b>	
<b>Course Title</b>	Web Programming
<b>Academic Year</b>	I
<b>Semester</b>	II
<b>Number of Credits</b>	3
<b>Course Prerequisite</b>	Basics of Html, Basics of network programming
<b>Course Synopsis</b>	This course uses the syntax and semantics of HTML and XHTML and develop different parts of a web page to understand how CSS can enhance the design of a webpage. Learners will create and apply CSS styling to a webpage to get familiarity with the JavaScript language and understand Document Object Model handling of Java Script
<b>Course Outcomes:</b> At the end of the course students will be able to:	
CO1	Explain the historical context and justification for HTML over XHTML.
CO2	Develop HTML5 documents and adding various semantic markup tags.
CO3	Analyse various attributes, values and types of CSS.
CO4	Implement core constructs and event handling mechanisms of JavaScript.
<b>Mapping of Course Outcomes (COs) to Program Outcomes (POs) &amp; Program Specific Outcomes:</b>	

COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PSO1	PSO2	PSO3

Name of the Department	Computer Science & Engineering
Name of the Program	Bachelor of Computer Applications
Course Code	
Course Title	Web Programming Lab
Academic Year	I
Semester	II
Number of Credits	1
Course Prerequisite	Basics of Programming
Course Synopsis	In this course, Students will study about basic and advanced concepts of HTML and CSS Programming.

## Course Outcomes:

At the end of the course students will be able to:

CO1	Demonstrate problem solving skills by developing and implementing algorithms to solve problems.
CO2	Implement programs using functional program pedagogy.
CO3	Demonstrate an understanding of array, structures and pointers.
CO4	Implement programs using functional program pedagogy.

## Mapping of Course Outcomes (COs) to Program Outcomes (POs) & Program Specific Outcomes:

COs	PO1	PO2	PO3	PO4	PO5	PO6	PO7	PO8	PSO1	PSO2	PSO3
CO1	3	3	3	2	-				2	2

CO4	2	3	2	3	2				3	1	
Average	1.7	3	1.2	1.2	0.7				1.2	0.7	

**Course Content:**

L (Hours/Week)	T (Hours/Week)	P (Hours/Week)	Total Hour/Week
		2	2

Unit	Content & Competencies
1	Write an HTML code to display your education details in a tabular format. (C1: Knowledge)
2	Write an HTML code to display your CV on a web page. (C1: Knowledge)
3	Write an HTML code to create a Home page having three links: About Us, Our Services and Contact Us. Create separate web pages for the three links. (C1: Knowledge)
4	Write an HTML code to create a login form. On submitting the form, the user should get navigated to a profile page. (C1: Knowledge)
5	Write an HTML code to create a Registration Form. On submitting the form, the user should be asked to login with this new credentials. (C1: Knowledge)
6	Write an HTML code to create your Institute website, Department Website and Tutorial website for specific subject. (C1: Knowledge)
7	Write an HTML code to illustrate the usage of the following: <input type="checkbox"/> Ordered List <input type="checkbox"/> Unordered List <input type="checkbox"/> Definition List (C1: Knowledge)

8	Write an HTML code to create a frameset having header, navigation and content sections. (C1: Knowledge)
9	Write an HTML code to demonstrate the usage of inline CSS. (C1: Knowledge)
10	Write an HTML code to demonstrate the usage of internal CSS. (C1: Knowledge)
11	Write an HTML code to demonstrate the usage of external CSS. (C1: Knowledge)
12	Creating Style Sheet (C6:Synthesis)
13	CSS Styling(Background, Text Format, Controlling Fonts) (C6:Synthesis)
14	CSS Id and Class (C6:Synthesis)
15	CSS Advanced(Grouping, Dimension, Display, Positioning, Floating, Align, Pseudo class, Navigation Bar, Image Sprites, Attribute selector) (C6:Synthesis)
16	Creating page Layout and Site Designs. (C6:Synthesis)
17	Writing program in XML and create a style sheet in CSS & display the document in internet explorer. (C1: Knowledge)
